EVENT NAME

Worcester Bosch WEX visit, meet & greet

NUMBERS ATTENDED

2x Yr10s

WRITE UP

On Wednesday 16th May we took two Yr10 students to Worcester Bosch for a brief tour and to visit their recycling department to secure 2x extended work experience placements. We were informed about the whole recycling process at Worcester Bosch, where they are 100% 'green' with no old parts going to land-fill.

Our students they had the opportunity to 'have-a-go' and were able to dismantle some boiler parts, splitting them down and sorting the relevant components into their respective recycling bins.

The visit was a huge success and both students are now very keen to move forward with their placements. They now have to attend a 3 hour H&S and manual handling induction session, and once this has been completed, both students can start their placements – hopefully after the May HT holiday.

Our thanks now goes out to Mark, Gary and the team for offering our students this wonderful opportunity.
